

Goal 3 – Columns

Some of Dave's fields have more rows than columns. Dave wants to harvest those fields by columns (going north<->south instead of east<->west). In addition to the starting plot (still always a corner plot), Dave wants to define the direction in which the harvester drives.

1	2	3	4
5	6	7	8
9	10	11	12

Input: <#ofRows> <#ofColumns> <StartRow> <StartColumn> <Direction>

StartRow: 1 | <#ofRows>

StartColumn: 1 | <#ofColumns>

Direction: 'N' | 'O' | 'S' | 'W'

Output: <Nr1> <Nr2> ... <NrN>

Goal 3 – Examples

Example 1 - Input: 3 4 1 1 S
Output: 1 5 9 10 6 2 3 7 11 12 8 4

Example 2 - Input : 5 2 5 2 N
Output: 10 8 6 4 2 1 3 5 7 9

Example 3 - Input : 23 12 23 1 N
Output: 265 253 241 229 217 205 193 181 169 157 145 133 121 109 97 85 73 61
